

Air Quality Briefing Note

Date: September, 2017

Issued by: Sherry MacIntyre

Agency: Public Member on behalf Fraser Basin Council

2016 Phase III PM_{2.5} Goal

- A 40% reduction from all significant sources;
- A daily average not to exceed 25 micrograms per cubic meter of air; and
- An annual average of 5 micrograms per cubic meter of air.

Questions

What have you done in the last 12 months? In the past year I have continued to follow Eco Driving strategies such as planning shopping activities to coincide with driving home to minimize vehicle use as per Phase III Transportation goals.

In my home I use a programmable thermostat so in winter months it is turned down to 15 °C overnight and during the day when I am away at work as per Phase III Residential goals.

What are you planning to do in the next 12 months? Use the public transit system more frequently (at least twice a week). Keep up regular maintenance on my truck to keep emissions to a minimum. Continue following Eco Driving strategies as per Phase III Transportation goals.

What is your long-term plan to meet the 2016 goal? Continue to search for ways to reduce my personal emissions. I hope to continue with PGAIR to help meet the goal for the Prince George airshed. I will continue to educate people as to how they can reduce their individual emissions at home as well as at work.

Please indicate your self-assessed progress during the past 12 months:
