

- Members from industry, government and Environmental Society
- Meet twice a year
- Reports on progress and plans to improve air quality

Williams Lake airshed – It's about health

- Started with 4th worst air PM10 quality in BC overall

PM 10 Concentration (ug/m3)

Biomass electric generation since ~1993

Improvements to air quality

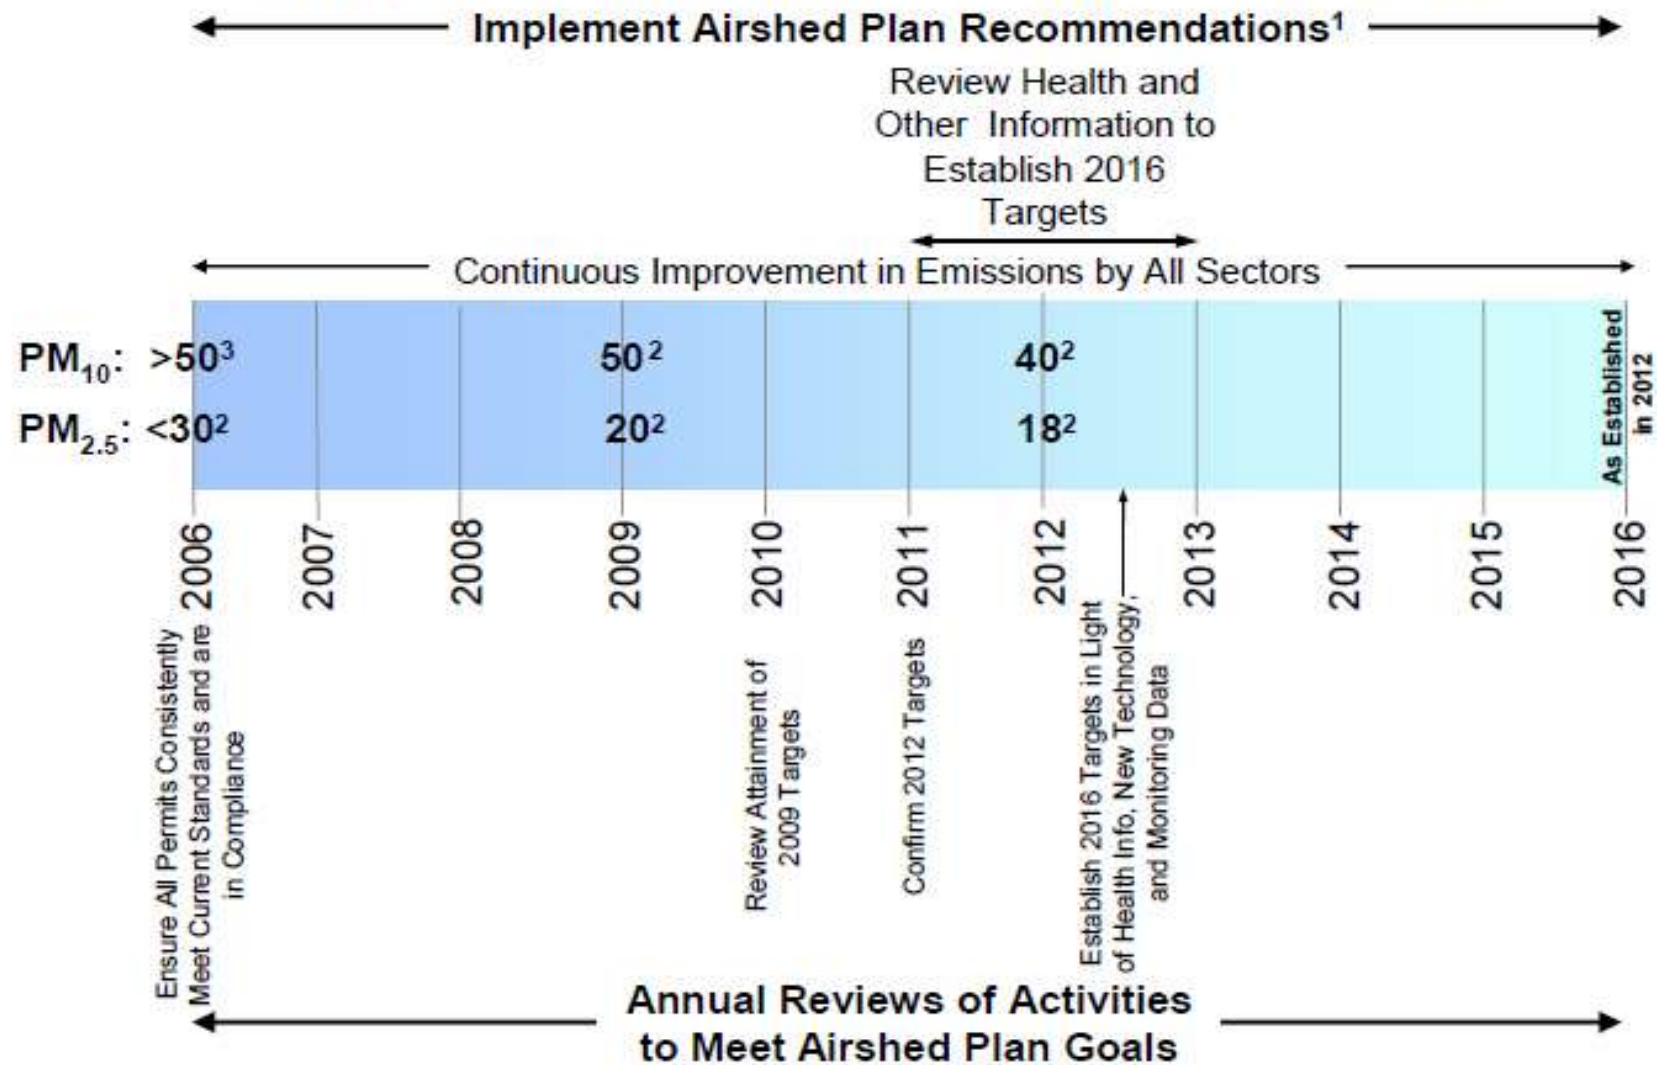

- Eliminated last silo burner
- West Fraser Plywood plant installed scrubber
- Replaced some cyclones with baghouses

- Reduced track-out, load covers and fugitive dust
- City implemented anti-idling policy saving\$
- Education
- Learning together

Williams Lake Airshed Plan 2006 - 2016

1: Incorporate into community and industry planning as opportunities arise.

2: µg/m³; based on a 24-hour average, and achievement is based on the 98th percentile ambient measurement annually, averaged over 3 consecutive years (allows for 7 days of exceedance per year).

3: µg/m³; 24-hour average not to be exceeded.

Progress made, work to be done. Thanks.
